

FACTORY SENTINEL

INDUSTRIAL ROBOTS

*A ready-to-deploy platform to monitor
industrial robots, prevent unexpected failures
and achieve worry-free uptime*

Powered by **pdx**

All of the benefits of a more complex, custom solution in a rapidly deployable, scalable application.

Factory-Sentinel for Industrial Robots, powered by the Predictrionics PDX Platform, is an off-the-shelf data visualization and analysis application to manage and monitor the condition of industrial robots.

Its intuitive interface and built-in algorithms require no prior data science experience, enabling factory personnel to visualize robot health, predict failures, report degrading assets and quickly deploy solutions that prevent unexpected downtime.

Factory-Sentinel enables educated decision-making for worry-free uptime

KEY FEATURES

- Intuitive Health and Predictive Visualizations
- Machine Learning and Pattern Recognition
- Compatible with All Robot Makes and Models
- Automated, Customizable Reports
- Real-time Alerts for Degrading Assets

Monitor

for **worry-free** uptime.

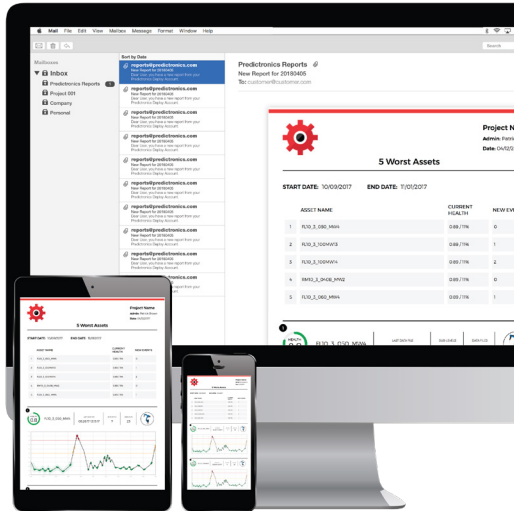

Predict

health values over time.

Report

to **prevent** unexpected failures.
